Monday - Friday 8 a.m. - 4 p.m.

DUNDURN RURAL WATER UTILITY

September 2021

Volume 12 Issue 3

NO WATER RATE INCREASE

The City of Saskatoon and SaskWater have stated that they will be increasing the Utilities water rate by 4% for the 2022 year. The Utility will NOT be raising our Subscribers water rate for 2022, as we were able to absorb the increase.

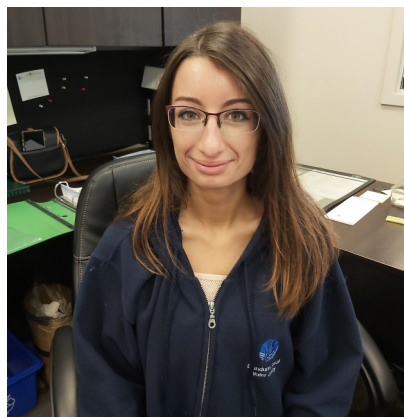

Marker Posts

As winter approaches, it is important to be able to find your curbstop through the snow all winter long. In order to be able to find it quickly in an emergency the Curbstop must be marked. All curbstops should have a marker post beside them, this will either be a red wooden post or a metal post that reads Dundurn Rural Water Utility. If your post is missing, please call the office and our maintenance staff will come replace your post before winter.

Staff Changes !

Chantel will be off for the next year as she will be on Maternity leave. We wish her and Matthew all the best.

We are happy to welcome Sara Ormerod and we are pleased to have her as our newest member of our TEAM !

****If you obtain a new phone number, email, or address, please call our office and update your information as soon as possible.**

The DRWU Office will be closed on Monday, October 11th for Thanksgiving, Thursday, November 11th for Remembrance Day, and Friday, December 24th to Monday, December 27th for Statutory holidays and Christmas break.

DUNDURN RURAL WATER UTILITY SEPTEMBER, 2021 NEWSLETTER

We are so excited to tell you about Chantel's new baby ! Matthew and Chantel welcomed Jace into their lives on September 16th. They are all doing well and we wish them all the best.

Jace Edward Hendry born September 16, 2021, weighing 7.2lbs.

Do you think your water consumption might be too high? Please read.

There are a few different ways to see if our water subscribers are losing water. First the subscriber should ensure there is no water being used anywhere in the house (i.e. dishwasher, washing machine, etc.) Listen to the pressure system to see if it is cutting in and out. If the system is cutting and in and out and no water is being used in the house, that means there could be a leak somewhere. The next thing to do is look into all the floor drains. If no water is being used in the house, there should be no water going down the drain. If water is going down the drain, make sure to check the furnace humidifier filter, as it could be plugged causing water to go directly down the drain tube below the humidifier. Another way to check is take off the lid on each toilet tank. The level of water should be 1/4" below the top of the overflow pipe. If it is not, it should be adjusted lower. Additionally, make sure to check the float in your holding tank as it can become stuck causing water to drain out.

Water Fill Station

Good News! The annual fee for a FOB has been reduced from \$20.00 to \$15.00. This charge will be applied to all FOB's sold to the end of 2021. The fee will be automatically charged on to your credit card (if saved on file) or will be invoiced in March 2022.
